The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30, 31 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin.

Martin discloses encapsulated finely divided pigment particles suitable for use in paints. These particles are taught as admixed, in suspension, with polymerizable monomer and non-ionic surfactant followed by polymerization. The polymer coating is seen as meeting the limitations of applicants' first additive while the surfactant is seen as meeting the limitations of applicants' second additive.

Therefore the reference anticipates the rejected claims.

Claims 18-29 and 32-37 are allowed.
